PROFILE SUMMARY

Power BI Developer offering 3 years of focused expertise in cloud BI and data architecture, built on a strong foundation of 10+ years in electronics test equipment & automation technology. Specialized in architecting and deploying end-to-end automation and business intelligence solutions across the Microsoft Power Platform (Power BI, Power Automate, Power Apps). Proven ability in optimizing enterprise-scale data models and implementing strict data governance (RLS/OLS) to ensure integrity, drive measurable efficiency, and maintain compliance across complex business domains.

CORE TECHNICAL COMPETENCIES

- **Data Analysis & Modeling:** Power BI, Data Visualization, DAX, Semantic Model Architecture, Financial Modeling & Forecasting, Performance Tuning
- **Fabric & Data Engineering:** Microsoft Fabric, Lakehouse & Data Warehouse, Data Ingestion, CI/CD & Pipeline Orchestration
- **Languages & Tools:** Python, SQL, Power Query M, Azure DevOps, Visual Studio, Report Builder, Power Automate, Power Apps
- **Governance & Cloud:** Microsoft Entra ID, Row-Level Security (RLS) & OLS, Dataverse/Dynamics 365, Microsoft Office 365

PROFESSIONAL EXPERIENCE

Sept 2024 - Present **Power BI Developer/Power Platform Developer | D&E Air Conditioning Pty Ltd | Melbourne, Victoria, Australia (Remote)**

- Designed executive-ready Power BI dashboards with strong visual hierarchy and corporate branding, enabling faster, data-driven decision-making for senior management.
- Built scalable Power BI semantic models with Power Query, DAX, and centralized Dataflows, supporting consistent enterprise reporting and reducing development redundancy.
- Developed Paginated Reports integrated into Power Apps Model-Driven solutions, enabling efficient generation of fixed-layout, printable business documents.
- Improved data reliability by implementing staging-layer Power Query patterns, enabling faster issue detection and validation.
- Provided technical optimization for Microsoft Fabric workflows, streamlining data ingestion via Notebooks and SQL to enhance Power BI Semantic Model robustness.
- Supported and enhanced Dynamics 365 Model-Driven apps by updating Dataverse schema, maintaining system integrity, and enabling new business processes.

Feb 2023 – Dec 2024 **Finance Business Analyst/Power BI Developer | Lexmark R&D Corporation | Cebu City, Cebu, Philippines (Hybrid)**

- Partnered with finance stakeholders to translate business requirements into actionable BI solutions, enabling faster, data-driven decision-making.
- Delivered financial dashboards and reports supporting forecasting, budgeting, and performance analysis, driving informed strategic decisions.
- Ensured data accuracy, governance, and integrity across enterprise reporting

- solutions, maintaining stakeholder trust and reliable reporting.
- Led end-user training and support, improving adoption and data literacy across finance teams.
- Provided optimization, troubleshooting, and enhancements to BI solutions, maintaining performance and alignment with evolving business needs.

Aug 2015 – Jan 2023
Laguna, Philippines

Senior Board Repair Specialist | Linksphere Technologies Corporation | Binan City,

- Analyzed repair and failure datasets to identify patterns and recurring issues, uncovering process improvement opportunities that enhanced operational efficiency.
- Built and maintained Excel-based tracking systems to monitor performance metrics and repair outcomes, ensuring reliable data for operational decisions.
- Produced structured documentation and reports from repair data, supporting data-driven decision-making and process improvements.

OTHER RELEVANT EXPERIENCE

Jan 2025 – Present

Power BI Developer (Part-time) | AvantGuard LLC | Milford, Connecticut, USA

- Developed and optimized semantic models to support Managed Service Provider (MSP) reports, enabling accurate and scalable operational insights.
- Created interactive Power BI dashboards and reports to visualize trends and provide actionable insights, improving stakeholder decision-making.
- Automated financial reporting workflows by migrating spreadsheet-based processes to Power BI, reducing manual effort and increasing reporting accuracy.

Aug 2024 – Oct 2024

Power BI Developer (Part-time) Moderno Plant X | Houston, Texas, USA

- Configured Power BI Service and developed dashboards to visualize OEE metrics, including embedded URLs for web integration, enabling real-time monitoring and data-driven operational decisions.
- Designed and implemented ETL processes with SQL and Power Query to integrate and transform multi-source data, supporting accurate and actionable reporting.
- Created interactive dashboards and reports in Power BI to present trends and insights, ensuring clear and impactful data storytelling for stakeholders.

Dec 2021 – Mar 2022

Python Developer (Project-based) | Excigence Asia Inc | Binan City, Laguna, Philippines

- Built data analysis workflows using Pandas to clean, transform, and analyze test and operational datasets.
- Created compelling and informative data visualizations using Matplotlib to present findings and insights.
- Designed and developed a Python-based GUI application (Tkinter) to manage and execute electronic test scripts, improving usability and execution efficiency.

EDUCATION

BS in Industrial Technology, major in Electronics

Cebu Technological University-Main Campus

CERTIFICATIONS

PL-300: Microsoft Power BI Data Analyst | Passed: Aug 2024 | Renewed: Aug 2025

Google Business Intelligence Professional Certificate | Coursera | Feb 2024

Google Data Analytics Professional Certificate | Coursera | Jan 2023

Data Associate | Project SPARTA | Nov 2022
